Policy Overview

Cosmetic procedures or procedures connected with cosmetic surgery are not reimbursable. The Centers for Medicare and Medicaid Services (CMS) define cosmetic procedures as “a procedure that is performed to reshape normal structures of the body in order to improve the patient’s appearance and self-esteem.” These procedures can be performed for medically necessary or cosmetic reasons.

Application

This policy applies to professional and institutional claims.

Reimbursement

Louisiana Healthcare Connection code editing software will review claim lines to determine if a procedure code is potentially cosmetic in nature.

If a procedure code is identified, the current claim and claims history will be reviewed (prior to payment) by a clinical review nurse to determine if the procedure appeared to be purely cosmetic in nature.

Example

Breast surgery is performed on a patient with a history of breast cancer and a mastectomy is found in claims history.

In the above example, the surgery is recommended for payment since the procedure was not performed for purely cosmetic purposes.

If the current claim information and claims history does not support a clinically appropriate circumstance, the claim line billed with the cosmetic procedure code and all associated procedures identified as related to the procedure will be denied.
