Coding Implications
Revision Log

See [Important Reminder](#) at the end of this policy for important regulatory and legal information.

Policy Overview

Louisiana Healthcare Connection edits based on Current Procedural Terminology (CPT) and Healthcare Common Procedure Coding System (HCPCS) descriptions and guidelines which are published by the American Medical Association (AMA). These prepay claims edits are utilized for professional and outpatient facility claims, auditing for potential coding errors.

The purpose of this policy is to identify instances in which a procedure code is billed with an inappropriate place of service per CPT/HCPCS guidelines. For some CPT and HCPCS codes, criteria are included for where these services may be performed. According to the CPT manual, place of service (POS) should be specified and match the procedure code's description and/or guidelines for use. The edit takes AMA, CMS, and state guidelines into consideration to ensure accurate reimbursement for services provided.

Application

1. Physician and Non-physician Practitioner Services
2. Outpatient Institutional Claims

Reimbursement

Procedure codes reported with an inappropriate place of service will be denied on a prepayment basis through claims edits applied by code auditing software.

Any procedure code which has been reported appropriately per the guidelines in this transparency policy remains subject to all other applicable reimbursement policies and guidelines.

Definitions

Place of Service: A numerical code on a claim indicating the entity where service(s) were rendered.

Prepayment Claims Edit: Edit applied to one or more claim lines during the adjudication process prior to payment, based on the most likely clinical scenario in accordance with all applicable coding guidelines.
