

Clinical Policy: Enfuvirtide (Fuzeon)

Reference Number: CP.PHAR.41

Effective Date: 06.01.10

Last Review Date: 08.18

Line of Business: Commercial, HIM, Medicaid

[Revision Log](#)

See [Important Reminder](#) at the end of this policy for important regulatory and legal information.

Description

Enfuvirtide (Fuzeon[®]) is a human immunodeficiency virus-1 (HIV-1) fusion inhibitor.

FDA Approved Indication(s)

Fuzeon is indicated for use in combination with other antiretroviral agents for the treatment of HIV-1 infection in treatment experienced patients with HIV-1 replication despite ongoing antiretroviral therapy.

Policy/Criteria

Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.

It is the policy of health plans affiliated with Centene Corporation[®] that Fuzeon is **medically necessary** when the following criteria are met:

I. Initial Approval Criteria

A. HIV-1 Infection (must meet all):

1. Diagnosis of HIV-1 infection;
2. Prescribed by or in consultation with an infectious disease or HIV specialist;
3. Age \geq 6 years;
4. Failure of \geq 12 weeks of antiretroviral therapy which includes 2 nucleoside analogue reverse transcriptase inhibitors and 1 drug from one of the following classes: an integrase strand transfer inhibitor, a nonnucleoside analogue reverse transcriptase inhibitor, or a pharmacokinetic enhanced protease inhibitor;
5. Current (within the past 30 days) HIV ribonucleic acid viral load \geq 200 copies/mL;
6. Fuzeon is prescribed concurrently with additional antiretroviral agents to which member is susceptible;
7. Dose does not exceed 180 mg/day.

Approval duration:

Medicaid/HIM – 6 months

Commercial – 6 months or to the member's renewal date, whichever is longer

B. Other diagnoses/indications

1. Refer to the off-label use policy for the relevant line of business if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized): CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance marketplace, and CP.PMN.53 for Medicaid.

II. Continued Therapy

A. HIV-1 Infection (must meet all):

1. Currently receiving medication via Centene benefit, or documentation supports that member is currently receiving Fuzeon for HIV-1 and has received this medication for at least 30 days;
2. Member is responding positively to therapy;
3. If request is for a dose increase, new dose does not exceed 180 mg/day.

Approval duration:

Medicaid/HIM – 12 months

Commercial – 6 months or to the member’s renewal date, whichever is longer

B. Other diagnoses/indications (must meet 1 or 2):

1. Currently receiving medication via Centene benefit and documentation supports positive response to therapy.

Approval duration: Duration of request or 6 months (whichever is less); or

2. Refer to the off-label use policy for the relevant line of business if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized): CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance marketplace, and CP.PMN.53 for Medicaid.

III. Diagnoses/Indications for which coverage is NOT authorized:

- A.** Non-FDA approved indications, which are not addressed in this policy, unless there is sufficient documentation of efficacy and safety according to the off label use policies – CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance marketplace, and CP.PMN.53 for Medicaid or evidence of coverage documents.

IV. Appendices/General Information

Appendix A: Abbreviation/Acronym Key

FDA: Food and Drug Administration

HIV-1: human immunodeficiency virus-1

RNA: ribonucleic acid

Appendix B: Therapeutic Alternatives

This table provides a listing of preferred alternative therapy recommended in the approval criteria. The drugs listed here may not be a formulary agent for all relevant lines of business and may require prior authorization.

Drug Name	Dosing Regimen	Dose Limit/ Maximum Dose
Nucleos(t)ide reverse transcriptase inhibitors (NRTIs) (e.g., abacavir, tenofovir disoproxil fumarate, Emtriva [®] , etc.)	Refer to prescribing information	Refer to prescribing information
Non-nucleoside reverse transcriptase inhibitors (NNRTIs)	Refer to prescribing information	Refer to prescribing information

Drug Name	Dosing Regimen	Dose Limit/ Maximum Dose
(e.g., efavirenz, nevirapine, Edurant [®] , etc.)		
Integrase strand transfer inhibitors (INSTIs) (e.g., Tivicay [®] , Isentress [®])	Refer to prescribing information	Refer to prescribing information
Protease inhibitors (PIs) (e.g., atazanavir, fosamprenavir, Invirase [®] , Viracept [®] , etc.)	Refer to prescribing information	Refer to prescribing information
Fixed-dose combinations (e.g., Genvoya [®] , Stribild [®] , Odefsey [®] , Descovy [®] , Truvada [®] , etc.)	Refer to prescribing information	Refer to prescribing information

Therapeutic alternatives are listed as Brand name[®] (generic) when the drug is available by brand name only and generic (Brand name[®]) when the drug is available by both brand and generic

Appendix C: Contraindications

Not applicable

Appendix D: General Information

Per the Department of Health and Human Services Antiretroviral Guidelines:

- Evaluation of virologic failure should include as assessment of adherence, drug-drug or drug-food interactions, drug tolerability, HIV ribonucleic acid (RNA) and CD4 T lymphocyte (CD4) cell count trends over time, treatment history, and prior and current drug-resistance testing results.
- Virologic failure is defined as the inability to achieve or maintain suppression of viral replication (to an HIV RNA level < 200 copies/mL). Patients with levels persistently above 200 copies/mL, especially > 500 copies/mL, often develop drug resistance.
- Virologic suppression is defined as a confirmed HIV RNA level below the limit of assay detection (e.g., < 48 copies/mL).
- There is no consensus regarding how to manage patients with HIV RNA levels > 48 copies/mL and < 200 copies/mL. The risk of emerging resistance is believed to be relatively low. HIV RNA levels should be monitored at least every 3 months to assess the need for changes in antiretroviral therapy in the future.

V. Dosage and Administration

Indication	Dosing Regimen	Maximum Dose
HIV-1 infection	Adults: 90 mg SC BID Pediatric patients (6-16 years): 2 mg/kg SC BID up to 90 mg/dose	180 mg/day

VI. Product Availability

Lyophilized powder in vial: 108 mg (90 mg/mL when reconstituted)

Reviews, Revisions, and Approvals	Date	P&T Approval Date
Added necessity for prior treatment to algorithm Updated background information	10.13	11.13
Replaced safety table with expanded adverse events description Updated background information Updated description section	09.14	11.14
Converted policy to new format. Added abbreviation key In criteria: therapy initiation shortened to three months; specified HIV diagnosis as a diagnosis of HIV-1; added requirement that management be overseen by an HIV specialist; changed “experiencing continued HIV replication” to “failure to achieve or maintain”; added requirement that patient’s new Fuzeon-based regimen be based on an assessment for drug resistance and medication intolerance, and that the regimen include at least a total of two antiretroviral agents. Added attestation regarding unacceptable toxicity in the therapy continuation section.	09.15	11.15
Policy converted to new template. Added maximum dose and contraindications per PI; added antiretroviral therapy regimen per DHHS; modified criteria so that virologic failure defined by > 200 copies/ml of HIV RNA per DHHS guideline; added requirement for resistant test for patients with > 500 copies of HIV RNA on renewal criteria; added the need for continued treatment with other ARV to renewal criteria; added maximum dose requirement. Modified approval duration to 6 months and 12 months for initial and reauthorization criteria respectively.	10.16	11.16
Converted to new template; references updated	09.17	11.17
3Q 2018 annual review: policies combined for Centene Medicaid, HIM (new), and Commercial lines of business; no significant change from previously approved corporate policy; Medicaid: HIV specialist added as prescriber option, removed re-auth requirement for drug resistance testing if current HIV RNA is at least 500 copies/mL; Commercial: age and prescriber requirement added, initial: requirement for current HIV RNA at least 200 copies/mL added,	04.02.18	08.18

Reviews, Revisions, and Approvals	Date	P&T Approval Date
continued: requirement for specific decrease in viral load/increase in CD4 count replaced by general positive response statement; continued approval durations modified from length of benefit (Commercial) and 6 months (Medicaid) to 6 months or renewal date and 12 months, respectively; continuity of care added; references reviewed and updated.		

Important Reminder

This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. “Health Plan” means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan’s affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

Note:

For Medicaid members, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.

For Health Insurance Marketplace members, when applicable, this policy applies only when the prescribed agent is on your health plan approved formulary. Request for non-formulary drugs must be reviewed using the formulary exception policy.
